Information

Topic   **Migration of the PRISMA-Client into a Web-Frontend within the B2B-Portal.**
On 04/23/2012.

**Note: the project plan was updated. SOP is 04/23/2012.**

Dear ladies and gentlemen,

assurance of sustainable and successful cooperation within the BMW Group engineering network asks for continuous innovation in terms of new and tailored software solutions, with respect to current trends and technological advances. According projects and activities lead to ongoing optimization of the value chain.

The migration of the PRISMA user interface to a web-based frontend (PDM Web Client) describes such an activity. On April 23rd, 2012, the very functionality of the externally deployed PRISMA-client will be migrated into the PDM Web Client. Improvement of user-friendliness and flexibility in link-up processes are key goals of the project.

The project and its evolution affect all partners and suppliers that currently work with the PRISMA-client and do data-exchange.

Summarizing, the project consists of the following phases:

	2010		2011												2012			
	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr
Definition of functional scope	■																	
Bidding for specification		■■																
Specification 11.1				■■														
Bidding for IT concept + implementation + scoping specification					■■						CP1 Grid	CP2 Grid + DX	20.01.12 Software in I/Room					
IT concept + implementation 12.1							■■	■	■	◇		◇	Design Freeze		◆			
Integration test 12.1													23.01.12 Start Pre-I-Test	◇	13.02.12 Start I-Test ■			
Definition of deployment concept						■■	■■■■■■■■■■											
Deployment and integration													■■	■■■■■■		23.04.12 SOP ◆		

From a user's perspective, in particular the late specification and early scoping plus implementation, as well as the integration phase are of interest.

- Specification and scoping: in this early phase, the possibility for raising questions and exchanging information via a VTS within the B2B-Portal is provided. The link

to the VTS is:
https://b2bvtsp.bmw.com/sites/teco/Pep-Wiki/cepep/prisma

For access to the VTS site, a general VTS permission is required; refer to:
https://b2bpapp6.bmw.com/protected/en/apps/pug/vts/FS_VTS.pdf

- Integration: with a finished deployment concept, the new software is communi-cated. For the software rollout, partner- and supplier-communication is being planned, ranging from possible webinars to trainings through our academy.

We will provide detailed information on project activities and progress. Planned events are communicated on time.

In order to allow a seamless migration, we kindly ask you for active support by raising questions and comments within the VTS.

Kind regards,

Your project-team
